Make WordPress

Whether you're a budding developer, a pixel-perfect designer, or just like helping out, we're always looking for people to help make WordPress even better.

If you want to get involved in WordPress, this is the place to be. We've got blogs for each contributor group, general news, and upcoming events.

There are many different ways for you to get involved with WordPress:

Core

The core team makes WordPress. Whether you're a seasoned PHP developer or are just learning to code, we'd love to have you on board. You can write code, fix bugs, debate decisions, and help with development. Learn more about Core »

Weekly chats: Wednesdays @ 21:00 UTC
#core on Slack

Design

The design group is focused on the designing and developing the user interface. It's a home for designers and UXers alike. There are regular discussions about mockups, design, and user testing. Learn more about Design »

Theme Review Team

Welcome to the Theme Review team.

We are a group of volunteers who review and approve themes submitted to be included in the official WordPress Theme directory.

The Theme Review team maintains the official Theme Review Guidelines, the Theme Unit Test Data, and the Theme Check Plugin.

We also engage and educate the WordPress Theme community regarding best practices for themes.

Interested in joining the Theme Reviewers team?

Great! The team is open to anyone who wants to help out, and the process is simple. To find out more just visit the Join The Team page.

Want to know more? There is a more information in the Theme Review Team's Handbook and the Review itself.

Once you get a theme to review, you will also get a mentor to help you on the road to becoming a theme reviewer.

Weekly meetings

We use Slack for real-time communication. As contributors live all over the world, there are discussions happening at all hours of the day.

We have a project meeting every Tuesday, April 28, 2015 20:00 UTC+2 in the **#themereview** channel on Slack.

There are also weekly mentor meeting hours every Thursday, April 23, 2015 20:00 UTC+2 in **#themereview**

Details on the new theme settings (customizer) guideline

During yesterday's team meeting, we made what we knew would be a controversial decision about theme settings. This post will go into more details about this decision and how we plan to move forward.

(More …)

Request a theme

Clicking this button will assign you a theme. Do not click it if you are not a reviewer or if you do not want a theme assigned to you.

Please log in first to review.

So you want to be a theme reviewer? That's great. The team is open to anyone and you can easily get started following these steps.

1. Get access to Trac. All the themes live at themes.trac.wordpress.org. You will need access to this with a WordPress.org user account.
2. Join Slack. Visit chat.wordpress.org and sign up using your WordPress.org user account. You can then join the theme review team in #themereview. All our meetings are done in Slack, we advise all reviewers to at least try and attend the weekly one on Tuesday's at 18:00 UTC.
3. Subscribe to the blog on make.wordpress.org/themes. Being subscribed to this blog lets you keep in touch with the team and updates.
4. Set up your testing environment.
   - First up, you will need a testing installation. We advise at the start you following this guide on setting up Vagrant.
   - Import the theme unit test data into your installation. This gives you all the content you will need to run tests.
   - Set `WP_DEBUG` to `'true'` in your `wp-config.php` file.
   - Install the following Plugins (**Note: all plugins below can be installed via the Developer plugin**):
     - Theme Check
     - Debug Bar
     - Log Deprecated Notices
     - Monster Widget
     - WordPress Beta Tester

THEME: WP Clean Green – 1.0

Reported by:	deucethemes	Owned by:	jartes
Priority:	new theme	Keywords:	theme-wp-clean-green
Cc:	deuce@...		

Description

↳ Reply

WP Clean Green - 1.0

WP Clean Green is a magazine style blogging theme which displays posts by category on the home page, and has a range of features to customize the look without any coding necessary. With no code changes you can upload your own logo and/or favicon, add social media links, add a banner in the header, adjust the slider behaviour, change the main theme colors, or choose whether to display Author bios and/or related content on each post. It is simple and easy to use and looks great.

Theme URL - http://deucethemes.com/themes/clean-green/
Author URL - http://deucethemes.com

SVN - https://themes.svn.wordpress.org/wp-clean-green/1.0
ZIP - https://wordpress.org/themes/download/wp-clean-green.1.0.zip?nostats=1

✎ Edit ↪ Reply

- **Resolution** set to *not-approved*
- **Status** changed from *reviewing* to *closed*

Hi! Sorry, I'm late... Here comes the review:

Theme Check

REQUIRED

- `<title>` tag should only contain `wp_title()` function. For customization you should use `wp_title` filter.
- `post_class()` is missing in the `<article>` tag on `single.php`

Licence

REQUIRED

- Should specify the theme is under the GPL after the theme like: "Constructzine Lite is distributed under the terms of the GNU GPL"
- Which is the bundled images license?

Theme documentation

REQUIRED

- The Theme URI should be a page with info about the theme. In this case you used a demo site so the content must be related to the theme itself and not test data.

Code Quality

REQUIRED

- You should not hardcode charset on the meta located in header
- As you're prefixing all theme's functions with 'ti_', i found one function and a class that have different prefix:
  - Function `constructzine_customizer()` located in `includes/customizer.php`
  - Class `Example_Customize_Textarea_Control` located in `includes/customizer.php`

Stylesheets & Scripts

REQUIRED

- You don't need to enqueue `jquery` as it enqueues itself when you put it as a dependency from the Carousel.

Layout

REQUIRED

- Titles too long page title breaks subnav: https://cloudup.com/cq1iCruveT1
